SUMMARY

Software engineer with 3+ years of experience in java-based application development using **Spring Boot**. Skilled in debugging, troubleshooting, and handling customer-driven requirements to deliver reliable and scalable solutions. Hands-on experience with Kubernetes, CICD pipelines, and architectural design. Quick learner with strong problem-solving and system desing skills.

TECHNICAL SKILLS

Java	Kubernetes	Microservices Architecture
Spring Boot, Spring Framework	AI tools	Maven / Gradle
CICD Pipeline (Jenkins / GitHub Actions / GitLab CI)	Front-end (Bootstrap, React.js, Vue.Js)	

PROFESSIONAL EXPERIENCE

Software Engineer, Cerence Inc

May 2025 - Present

- Actively worked with multiple enterprise customers, translating customer-driven requirements into reliable, production-ready solutions and improving overall product quality.
- Led efforts to improve product stability and performance by debugging complex issues, optimizing service interactions, and enhancing error handling and observability.
- Developed and integrated an AI-driven agentic solution within the product to improve decision-making and outcome accuracy, resulting in more intelligent and context-aware system behavior.
- Collaborated with cross-functional teams to embed AI capabilities into existing workflows, ensuring seamless interaction between traditional microservices and AI components.
- Gained hands-on experience with Kubernetes and deployment pipelines.

Associate Software Engineer, Cerence Inc

August 2022 - May 2025

- Developed and engineered a product basedon microservice architecture.
- Created various REST APIs using Java, Spring Boot, JavaScript, and other technologies.
- Gained a good understanding of the latest technologies, including Kubernetes and deployment tools.
- Well-versed in the Agile development process, ensuring efficient and iterative project delivery.

Software Engineer Intern, Cerence Inc

January 2022 - July 2022

- Collaborated within a team to develop an AI-based application.
- Contributed to both the front-end and back-end development using Vue.js, React.js, MongoDB, Java, and the Spring Framework.

EDUCATION

Masters of Computer Application (MCA)

2020 - 2022

MIT WPU, Kothrud, Pune, MH

- CGPA - 9.64

Bachelor of Computer Application (BCA)

2017 - 2020

North Maharashtra University (NMU), Jalgaon

- CGPA - 9.07
